A versatile Computer Engineering graduate with experience in cybersecurity operations and software development. Seeking to leverage my expertise in security analysis, programming, and system development to contribute to innovative technology solutions. Proficient in Python, JavaScript, and web frameworks with a proven track record of developing secure and efficient applications.

PROFESSIONAL EXPERIENCE

NATIONAL TELECOM PUBLIC COMPANY LIMITED

Nov 2024 – Now

Cyber Security Operations Center (Security analyst : Tier 1)

- Analyzed and monitored security logs from various systems to identify potential cyber threats.
- Detected and responded to security incidents in real-time using SIEM tools.
- Generated reports and alerts for customers when suspicious activities or potential threats were identified.

INFINEON TECHNOLOGIES (THAILAND) LIMITED

Jun 2024 – Aug 2024

Intern (Wafer Test Engineer)

- Conducted a feasibility study on equipment communication protocols using SECS/GEM and Modbus for wafer test equipment.
- Developed Wafer Test tester authentication systems using Python, RFID technology and password authentication to enhance system security.
- Reference: Chaiwat Sittisombut, Wafer Test, Sr. Staff Engineer (+66 82 654 6441)

CAL-COMP ELECTRONICS (THAILAND) PUBLIC COMPANY LIMITED

Electronic Repair Technician

Sep 2021 – Dec 2021

- Diagnosed and repaired defective circuit boards, documenting issues and resolutions by model.
- Performed functional tests on boards to identify and rectify problems.

IT Support

Apr 2021 – Jun 2021

- Assisted in setting up production lines and ensuring smooth system operations.

Equipment Technician (Intern)

May 2020 - Mar 2021

- Supported production line setup, including building new lines and maintaining equipment.
- Managed equipment maintenance to ensure seamless assembly processes.
- Optimized production line efficiency by effectively managing time and resources.

SIAM INFORMATION TECHNOLOGY CO., LTD.

Oct 2018 – Feb 2019

Intern (IT SUPPORT/NETWORK)

- Installed electrical systems and LAN networks for internet connectivity.
- Configured routers and internet systems.
- Performed computer repairs and software installations.

EDUCATION

DHURAKIJ PUNDIT UNIVERSITY

2024

College of innovative Technology and Engineering, Computer Engineering

- Outstanding academic performance in Computer Engineering (2nd Year).

PROJECTS

- Customer Work Tracking System: Built a real-time tracking system with automated reporting, interactive charts, and user permission management. Reduced tracking time by 40% using HTML5, CSS3, JavaScript, and Chart.js
- Equipment Authentication System: Designed and developed a computer unlocking program using RFID scanning and password authentication, integrated with equipment-specific certificates and expiration dates. Implemented using Python and MySQL
- Intelligent Weather Monitoring System: Developed an IoT-based solution for real-time weather tracking and flood prediction using Raspberry Pi, Node-RED, and various sensors. Implemented Grafana dashboard for data visualization and integrated LINE Notify for alerts. Utilized MongoDB for data storage and computer vision for sky imaging.
- E-commerce Website: PHP-powered online store with user/admin functionalities and order tracking.
- Mobile Manga Reader: Cross-platform comic reading app developed using Flutter.

SKILLS

Languages: Thai and English

Software Programming: C, C#, Python, Java, Html, CSS, JS, Solidity and Dart

Software Applications: Android Studio, Arduino, Microsoft365 (Excel, Word, PowerPoint, Access), MSSQL, IBM Qradar

Equipment / Hardware: Raspberry Pi, ESP32 and ESP8266
